

SPRAY STOP TAPE - ESSENTIAL FOR ALL MARINE APPLICATIONS SOLAS REGS COMPLIANT

New from PSP Marine Tapes is Spray Stop, designed to prevent the spray of fuel, hot water or steam from burst pipes, pipe joints, flanges, boilers, exhaust manifolds, silencers and engine installations. This anti-splash tape can be used for many applications in the commercial marine, marine leisure and superyacht markets and is supplied in easy to stow, handy see through packs.

Spray Stop tape is now a requirement under SOLAS Regulation 11-2/15.2.11. The SOLAS Regulations are clearly aimed at minimising the risk of fire, which is prevented with two equally applicable measures - insulation of hot surfaces and screening or shielding of pipe connections in pipelines containing fuel oil, lubrication oil and hydraulic oil. Spray Stop tape is now an essential, low cost requirement for every marine engine room!

Spray Stop from PSP is a multi-layer aluminium and glass cloth, coated with a high performance, heat resistant silicon adhesive. Spray Stop in the retail pack is available in two widths 25mm or 50mm, each in one metre lengths and for the commercial market can be ordered in various widths by 10m rolls. The tape is easy to apply in an overlapping spiral wrap under tension and is quickly able to prevent leakage and splashing from hot, dangerous flammable liquids or steam.

PSP Marine Tapes' mission is to constantly evolve products to meet the discerning requirements of the marine world; in this instance to provide an essential tape which conforms with SOLAS. This is part of ongoing development to make sure that PSP's specialist products work for their customers and that they have the right solution to hand for safety, fastening or on board repairs. All PSP products are easy to find anywhere in the world – just look for the logo, which is the international code flags 'Papa, Sierra, Papa'.

Availability:

Via retailers and commercial distributors worldwide. If you experience difficulties obtaining this special tape please contact PSP direct.

Issued 23 April 2010
